# LOGENTHIRAN VISAGAN

As an undergraduate student, I am a dedicated and hardworking individual with a keen interest in acquiring knowledge and actively contributing to my academic environment. Through my involvement in various university clubs and societies, I have gained valuable insights and hands-on experience in many fields. This engagement has not only broadened my understanding of my academic discipline but has also honed my organizational and teamwork skills. I am committed to excellence in both my academic pursuits and extracurricular activities, demonstrating a strong work ethic and a passion for continuous learning. These experiences have not only enriched my academic journey but have also equipped me with the skills necessary to excel in a collaborative and dynamic environment.

## Projects

### FLEX- Online Food Ordering Application For Universities Second Year Project

#### HTML,CSS,PHP

I spearheaded the development of Project 1, an innovative online food ordering application designed for our university canteen. Leveraging PHP, HTML, and CSS, I created a user-friendly platform that streamlines the ordering process, providing students with a seamless and efficient experience. The project showcases my proficiency in web development and my dedication to enhancing campus services through technology.

### ARTIFEX - E commerce Website For Traditional Items Mini Project

#### JSP,JAVA,HTML,CSS

I designed and implemented a captivating e-commerce website for selling traditional items, utilizing JSP, Java, HTML, and CSS. The platform seamlessly integrates robust Java backend functionalities with an aesthetically pleasing front-end, ensuring a smooth and secure shopping experience. My expertise in web development is demonstrated through this project, showcasing my ability to merge technology and tradition in a user-friendly online marketplace.

### Vehicle Renting System Mini Project Java

I developed a comprehensive vehicle renting system using Java, offering a seamless and efficient solution for users. The application incorporates advanced Java functionalities to manage bookings, track vehicle availability, and facilitate secure transactions.

### Online Theatre Booking System Mini Project

#### C

I engineered an online theatre booking system using C, creating a streamlined platform for users to reserve seats and purchase tickets. Leveraging C's efficiency, the system optimizes performance in handling reservations, ensuring a seamless booking experience.

## Leaderships

- President of Tamil Union
- Director of Club Service of Interact club
- Finance Member of Gavel Club
- Leader of debate team
- oGV Member of AIESEC
